Milestone 1

Building the Database: - Creation of all the necessary tables.

Student Registration Page: - Developing a page that will enable students of Clemson University to register with the system.

Recruiter Registration Page: - Developing a page that will enable recruiters to register with the system.

Login Page: - A common login page for students, recruiters and administrator will be developed.

Milestone 2

Student Contact Page: - This page will contain the contact details of students in all the departments within the system.

Company Profile Page: - A page where the recruiters will provide information about their companies.

Milestone 3

Student Profile Page Features in List (a): - Student profile update feature and photo upload feature.

Student Profile Page Features in List (b): - Artifacts upload feature, Students Contact Page and list of Company Profiles Page navigation links.

Milestone 4

Messaging Service: - Building a messaging system for students to send messages to other students, recruiters and also to the system administrator.

Discussion Forums: - Forums for encouraging discussion among students within a company's profile page. These are monitored by the company's representatives and also by the system administrator.

Milestone 5

Testing the implemented features: - All implemented features will be tested during this phase and a draft copy of our project will be submitted when needed.

Revising Manual Documentation: - We will be developing manuals (both technical as well as user) as the project progresses. The final copy of documentation will be prepared during this week.

Prepare Final Project Copy: - Based on the feedback we receive from Dr. Roy Pargas on the draft copy, we will make suggested changes and prepare a final version of our semester project.
